

Recovery Support

*Together
We Can*

Support for the First Year of Recovery and Beyond

As part of our full continuum of care, Fairbanks offers personalized follow-up to support the recovery plans for individuals once they complete treatment. These programs help individuals and their families as they develop and enhance their recovery life skills, easing the transition back to work, school and the community.

Recovery Coaches

In the transition from treatment to recovery, recovery coaches are vital in keeping individuals on the path to lifelong recovery. A person will meet with his or her coach in weekly groups that introduce sober stress management, recovery maintenance and ideas to develop a balanced life without drugs or alcohol.

Parent Support, Family Support and Education

This program provides individual and family counseling for the continuing needs of everyone involved in the recovery process. Family support meetings allow individuals to connect with other families who are experiencing similar situations. This program is designed to help loved ones gain knowledge about what to expect when a family member leaves treatment and begins recovery.
